Project Background

In 2023, a variety of animal coins appeared, many of which only worked for a short time and were quickly removed from the market. Most of them created bad memories for their buyers.

Coins that entered the market with the slogan: the next Shiba or the next Dogecoin and caused many buyers to suffer.

In the meantime, the Lizard coin entered the market with the aim of regaining confidence to go through the stages of growth with honesty and transparency. We are here for the long haul and have many plans for growth.

To make Lizard a useful social currency with a real plans and a good environment, the Lizard team will exist as an important part of BSC.

Lizard Token Allocation

Lizard is a pure decentralized finance (DeFi) token running on the Binance Smart Chain (BEP-20). HIP aims to achieve a completely community-driven decentralized autonomous organization (DAO). Lizard total 15000000000, of which 60% directly destroyed, the remaining 40% of initial decentralized trading liquidity pools, as a pure community experiment, HIP team share, private equity, all tokens for community construction. Lizard is completely decentralized. All addresses will be published to the community for community supervision.

Lizard NFT

One of the most attractive assets of any coin and token project is its NFTs.

We will soon have a set of NFTs ready to distribute to the Lizard community.

These NFTs can be a turning point in the big Lizard project.

Lizard big plans

NFT

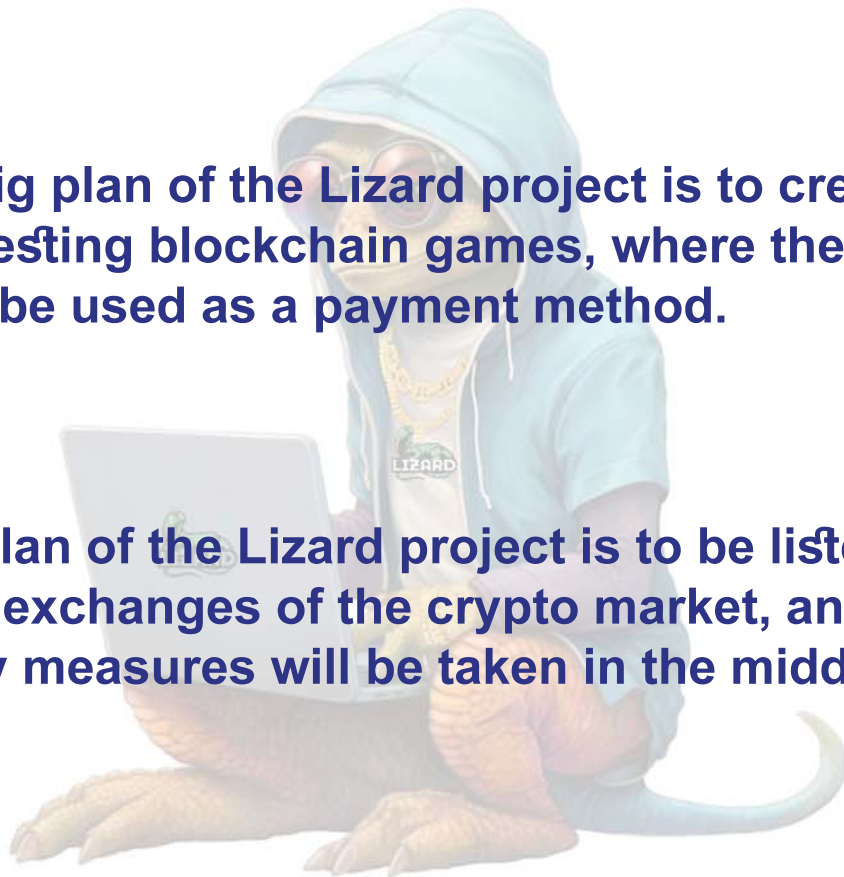

The construction and distribution of NFT is one of the most important plans of the Lizard project, which will be completed in the middle of 2024.

GAME

Another big plan of the Lizard project is to create and offer interesting blockchain games, where the Lizard token will be used as a payment method.

CEX

Another plan of the Lizard project is to be listed in the reputable exchanges of the crypto market, and the necessary measures will be taken in the middle of 2024.

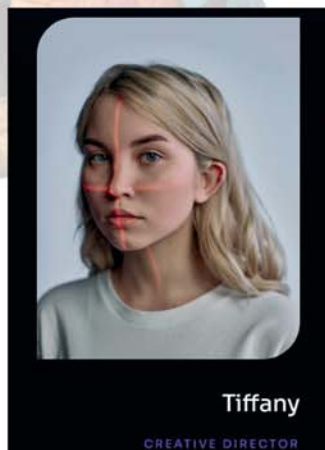

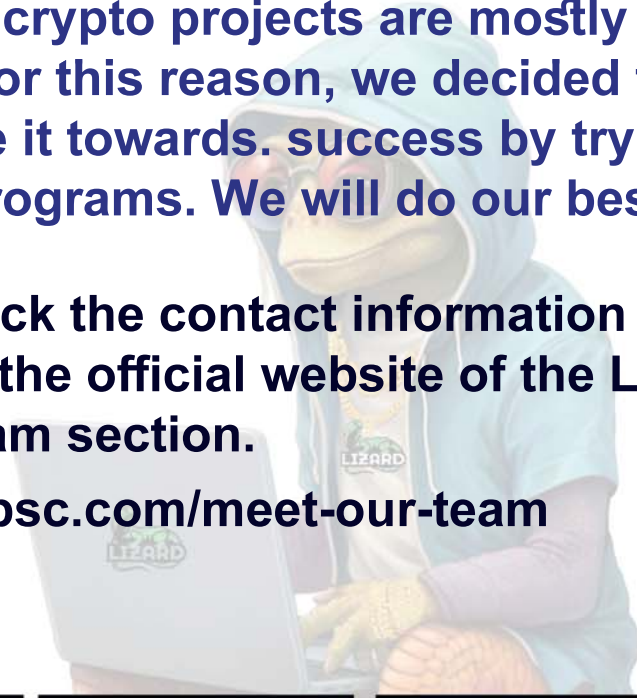

Lizard Team

We are a professional and old team that has been active in the crypto market since 2019. We have seen all the problems of the market. We have made a profit. We have also suffered losses. We have invested in many projects. We have seen various activities. During this time, we realized that crypto projects are mostly useless and short-term. For this reason, we decided to organize a project move it towards success by trying and carrying out expert programs. We will do our best in this way.

*You can check the contact information of the team members on the official website of the Lizard project and in the team section.
